

## MECOPREN® L 174/9

### Contact Adhesive

MECOPREN 174/9 is a high-quality, solvent-containing adhesive on a synthetic rubber base. It is being used for aerosol-fillings. The main application area of this spray adhesive is the conglutination of fabrics, soft foam, leather, card board, ceiling fabrics, coverings with synthetic leather/fabrics, vinyl, insulating boards and rubber with each other as well as with untreated wood and metal in the car industry. MECOPREN 174/9 is not suitable for hard foam (e.g. Styropor® of BASF AG) conglutinations.
